

ICE Task 4 (25)

Write a java program that:

1. Convert ArrayList to an array
Add these data into an ArrayList first (5)

|Maths|Physics|Chemistry|Biology|Probability|

Then perform the conversion.

2. From the array [1, -2, 0, 5, -1, -4], find all sets/possible values of x, y and z given that $x \leq y \leq z$, and the sum of all these variables is 2. (10)
3. Write a java program that write to and read file, make use of BufferedReader and BufferedWriter classes. Also show how you handle Input/Output exception. (10)
